(57) Abstract :

The present invention discloses a method [100] of revelation of natural dyes in fabrics for textile applications. A method of revelation of natural dyes in fabrics, the method comprising the steps of: storing the materials at the required temperature to maintain the natural properties of the plants; treating the said natural plants with the liquid solution; extracting the dyes from the natural plants; treating with natural materials to improve the quality of dyes; and, storing the dyes in a container to apply over the textile fabric and cotton materials. This method will help to improve the usage of plant species in textile industries for preparing the dyes and mordants.
